Research Questions

Explainable AI: What concepts does an encoder learn during training? Which ones are important for the downstream task? Can we detect biases at the embedding or concept level?

Representation Learning: How does a convolutional encoder work? What does it learn? What is a good neighborhood for self-supervised learning? Can we build a model from pretrained blocks?

Keywords: Mechanistic Interpretability, Explainable AI, Representation Learning, Unsupervised Methods, Deep Learning, Machine Learning

Research Positions

- since 2025** Postdoctoral Researcher, *Department of Mathematical Sciences*, Copenhagen University and Pioneer Centre for AI, Copenhagen, Denmark.
- Nov. 2024** Research Visit, *Department of Mathematical Sciences*, Copenhagen University, Copenhagen, Denmark.
- Aug. 2024** Research Visit, *Division of Systems and Control*, Uppsala University, Uppsala, Sweden.
- 2023-2025** Postdoctoral Researcher, *Machine Learning and Uncertainty*, Physikalisch-Technische Bundesanstalt, Berlin, Germany.
- 2020-2023** Postdoctoral Researcher, *Machine Learning Group*, UiT The Arctic University of Norway, Tromsø, Norway.
- Jan. 2019** Research Visit, *Machine Learning Group*, UiT The Arctic University of Norway, Tromsø, Norway.
- 2016-2020** Research Associate, *Machine Learning Leuphana Lüneburg*, Leuphana University of Lüneburg, Lüneburg, Germany.
- 2015** Research Associate, *Knowledge Mining and Assessment*, TU Darmstadt-ULB Darmstadt, Darmstadt, Germany.
- 2014** Research Associate, *Technology Based Assessment*, DIPF-Leibniz Institute for Research and Information in Education, Frankfurt am Main, Germany.
- 2013-2014** Research Associate, *Methoden der Empirischen Bildungsforschung*, TUM School of Education, Munich, Germany.

Education

- 2016-2020** Ph.D. in Computer Science, Leuphana University, Lüneburg, Germany.
Analysis of User Behavior
Main Supervisor: Ulf Brefeld.
- 2009-2012** Master, Fundamental Mathematics, UPMC, Paris, France.
2nd Year Thesis: Enumerative Tropical Geometry.
Main Supervisor: Jean Jacques Risler.
1st Year Thesis: Around cubic surfaces and their 27 lines.
Main Supervisor: Andreas Höring.
- 2009-2011** Master Merit Scholarship, UPMC, Paris, France.
- 2010** CAPES Externe de Mathématiques, France.
- 2008-2009** Bachelor, Mathematics, with Honors, UPMC, Paris, France.
- 2008** Admitted as free auditor at the ENS Cachan (Renounced).
- 2005-2008** Preparatory classes MPSI/MP, Lycée Chaptal, Paris, France.
- 2005** Baccalauréat (Science), with Honors, Lycée Jean Zay, Aulnay sous bois, France
- 2004** Academic Mathematic Olympiad: ranked 8th, Lycée Jean Zay, Aulnay sous bois, France.

Administrative Activities

2026	D3A workshop: <i>Tools and Methods for Operationalizing the AI Act in Research and Industry</i> . Copenhagen, Denmark.
Mai 7th 2026	Organizer YODA Workshop, Copenhagen, Denmark.
2025	D3A workshop: <i>Statistical perspectives on machine learning for health applications</i> . Copenhagen, Denmark.
2021-2023	Organizer in charge the reviewing process of the Northern Lights Deep Learning Conference nldl.org , Tromsø, Norway.
since 2015	Regular reviewer for ICML, Neurips, ICLR, ECML, Machine Learning Journal, DMKD...
2014	IZB Doctoral student representative at DIPF, Frankfurt, Germany.
2010	Master student representative to the Central Councils of UPMC, Paris, France.
2009-2011	Student representative to the Math Department's Board of UPMC, Paris, France.

Grants Application

2026	DDSA Small Even Grants, Copenhagen University, Copenhagen, Denmark: 40,000DKK
2025	Horizon Europe, Assessment methodologies for General Purpose AI capabilities and risks: Rejected
2024	DDSA Visit Grants, Copenhagen University, Copenhagen, Denmark: 15,000DKK
2024-2025	NAISS Small Compute, Berzelius-2024-259, National Supercomputer Centre, Sweden. ↗
2023	Incentiv call 2023, Fram Centre, Tromsø: 250,000 NOK (rejected).
2022	Declaration of Innovation for paper [5], UiT, Norway.
2019	Travel funds, Junior Research Fund of the Leuphana University, Lüneburg, Germany: 800EUR.
2009-2011	Master Merit Scholarship, UPMC, Paris, France.

Languages

English Fluent (TOEIC 990)	German Good (B2-C1)	Norwegian Basics (~A2)	French Mother tongue
--------------------------------------	-------------------------------	----------------------------------	--------------------------------

Collaborations

- **Christine Stratmann**, International Paediatric Brugada registry, since 2026.
The collaboration aims to investigate the use of NAVE for Brugada syndrome, a rare inherited arrhythmic condition that can lead to sudden death at a young age. The preliminary work shows that they also need update their standards for the collection and processing of ECGs.
- **Antônio H. Ribeiro**, Uppsala University
Arunashis Sau and **Konstantinos Patlatzoglou**, Imperial College London, started in 2024.
The collaboration aims to investigate the usage of explainable methods for electrocardiograms.
- **Line K. H. Clemmensen**, University of Copenhagen, since 2022.
The collaboration started as part of Kristoffer V. Olesen's doctorate on clustering methods for maritime behaviours. ↗ A second phase involved Rune Kjærsgaard and explored prototypical self-explainable models from the perspective of representation bias with the goal of maximizing the diversity. ↗ We are now investigating explainable representation learning for LLMs.
- **Sebastian Mair**, Linköping University, since 2020.
Colleagues of mine during my Ph.D. We worked on the speed up of Archetypal Analysis ↗. We are now investigating efficient representation learning for segmentation, explanation and privacy. We have have been granted computation resources on the Swedish Berzelius NSC (project Berzelius-2024-259).
- **Heidi Ahonen**, Norwegian Polar Institute, 2022-2023.
The collaboration investigated the usage of machine learning techniques for detection and segmentation of marine mammals vocalization and vessels in underwater recordings. It provided the topic and data for the master thesis of Tor Kjørtrød. ↗
- **Marina Höhne**, ATB Potsdam, 2022-2023.
Co-supervisor of Shristi Gautam, we investigated prototypical self-explainable models, their formalization and their evaluation. ↗ ↗
- **GE Healthcare** via Visual Intelligence, Norway, since 2021.
Industrial partners of Durgesh Singh's PhD. The project is about the automatic measurement of the left ventricle from echocardiography data using semi-supervised learning. A first paper is under review [25].
- **Tore Solberg** and **Tor Ingebrigtsen**, University Hospital of North Norway, 2021-2023.
The collaboration aimed to analyze the Norwegian spine surgery registry that both medical doctors are. I pre-processed the data and presented preliminary analyses which are now in the hands of the SPKI.

Outreach

May 27th, 2026	Driving AI 2026, IDA Conference, Copenhagen, Denmark. https://ida.dk/driving-ai
2023	Member of the Data Science for Social Good Community, Berlin ,Germany
Jan. 2021	Semaine de la Science, Lycée Feuillade Lunel, Montpellier, France https://slides.com/ahcene/semaine-de-la-science
Dec. 2019	User Behavior with Markov Chains, PyData MeetUp, Hamburg, Germany. https://slides.com/ahcene/pydata https://twitter.com/WunderMobility/status/1070989382952382466
2009	"Club de Math", Albert Camus elementary school, Bondy, France.

PhD Candidates:

- Durgesh Singh** PhD Candidate at UiT The Arctic University of Norway.
Learning from limited labels and its applications in medical imaging.
Main Supervisor: Michael Kampffmeyer, UiT The Arctic University of Norway.
2020-2025
- Srishti Gautam** PhD Candidate at UiT The Arctic University of Norway.
Towards Interpretable, Trustworthy and Reliable AI [↗](#)
Main Supervisor: Michael Kampffmeyer, UiT The Arctic University of Norway.
Co-supervisor: Marina Höhne, TU Berlin.
2020-2024

Bachelor/Master Students:

- Sijia Li** Master Thesis at University of Copenhagen, Denmark.
An explanation framework for time series explanations.
2026
- Johanna Ottosson & Laura Hansen** Bachelor Thesis at University of Copenhagen, Denmark.
Item response theory analysis of image classifiers.
2026
- Irem Ozseker** Master Thesis at TU Berlin, Germany.
Design of Benchmark Data to Validate Explainable AI Using Diffusion Models.
2025
- Hjalmar Schulz** Master Thesis at TU Berlin, Germany.
On the detection of the suppressor effect by XAI methods.
2024-2025
- Xhon Taraj** Bachelor Thesis at TU Berlin, Germany.
Evaluating feature activation explanations on medical images.
2024-2025
- Wangwang Tan** Master Thesis at TU Berlin, Germany.
Centroid-based deep clustering models for continuous learning.
2024
- Luca M. Cornils** Master Thesis at TU Berlin, Germany.
Design of Benchmark Data to validate explainable Artificial Intelligence.
Co-supervisor: Rick Wilming, TU Berlin, Germany
2023-2024
- Tor Kjødtrød** Master Thesis at UiT The Arctic University of Norway, Norway.
Unsupervised segmentation of submarine recordings. [↗](#)
Co-supervisor: Heidi Ahonen, Norwegian Polar Institute, Norway.
2022-2023

Alessandro Buttignon	Master Thesis at Leuphana University, Germany. <i>Multivariate anomaly detection using hierarchical temporal memory (HTM)</i> . Summer 2019.
Shailee Jain	DAAD bachelor exchange student from NIT Surathkal, India. <i>Mining User Trajectories in Electronic Text Books</i> . Summer 2017 Now PostDoc at the Chang lab in the Department of Neurosurgery, UC San Francisco.
Louis Filstroff	Bachelor exchange student from Centrale Lille, France. Summer 2015 Now maître de conférences (Assistant Professor) at Centrale Lille, France.

Teaching

Winter 2024	<i>Physics-Informed Machine Learning</i> , Master, TU Berlin, Germany. Physics-Informed Neural Networks (PINNs) and Physics-Informed Neural Operators (PINOs), along with real-world applications.
2023-2024	<i>Uncertainty in Machine Learning</i> , Master, TU Berlin, Germany. Uncertainty in different paradigms of machine learning such as calibration, conformal prediction, Bayesian neural networks, diffusion models, etc.
Summer 2022	<i>Pattern Recognition</i> , Master, UiT The Arctic University of Norway, Norway. Bayes classifiers, SVM, kernels, neural networks, clustering, k-means, etc.
2020-2021	<i>Deep Learning</i> , Master/PhD, UiT The Arctic University of Norway, Norway. Auto-encoders and VAEs, CNNs and RNNs, GANs, Deep Clustering, Generative Models, etc.
2017-2018	<i>Mathematical Foundation</i> , Data Science Master, Leuphana University, Germany. Probability theory, statistics, linear algebra and functional analysis.
Winter 2018	<i>Machine Learning Lab</i> , Data Science Master, Leuphana University, Germany. Machine Learning projects.
Summer 2018	<i>Forecasting and Prediction</i> , Data Science Master, Leuphana University, Germany. Theory and techniques for data with time dependencies (Markov chains, CRF, Gaussian processes, etc.).
Summer 2018	<i>Scientific Computing with Python</i> , Master, Leuphana University, Germany. Basic introduction to programming in Python (variables, loops, conditions, functions, etc.) and some classical libraries (numpy, scipy, matplotlib).
Winter 2017	<i>Introduction to artificial Intelligence</i> , Bachelor, Leuphana University, Germany. Overview of central themes in AI, particularly search, planning and learning, ethics.
Winter 2013	<i>R : Introduction to Psychometrics</i> , Bachelor, TU Munich, Germany. Basic introduction to programming in R (variables, loops, conditions, functions, data frames, packages, etc.). Examples are taken from psychometric problems, in particular from Item Response Theory.
2012-2013	<i>UE33 Algèbre Linéaire</i> , Licence, Université Paris Dauphine, France. Classic linear algebra course, from vectors to eigenvector decomposition, for economics students.
2011-2012	<i>Tutor for 1st year Bachelor students</i> , UPMC, Paris, France.
2011	<i>"Winter School Success Program"</i> , Lycée Turgot, Paris, France. Review of high school program for A-Level in Mathematics.
2009	<i>"Club de Math"</i> , Albert Camus elementary school, Bondy, France. French, ~10 pupils, one quarter. Support hours in mathematics for good pupils from this disadvantaged area.

Talks and Poster Presentations

- 27.05.2026** *Under the Hood of Black-Box Models: Deciphering Neural Networks with NAVE* (Talk), Driving AI 2026, IDA Conference, Copenhagen, Denmark.
- 18.02.2026** *Inspecting Visual Models* (Talk), CogSys Seminar, Technical University of Denmark, Denmark.
- 17.11.2025** *Inspecting Visual Models* (Talk), DIKU Seminar, Copenhagen University, Denmark.
- 07.03.2025** *On the Evaluation of Hallucinations* (Talk), KI-Met Sondersitzung, PTB, Germany.
- 20.11.2024** *Explaining Explanations with Feature Activations* (Talk), UCPH Statistics Seminar, Copenhagen University, Denmark.
- 14.08.2024** *Representation Learning and XAI* (Talk), Seminar at the Division of Systems and Control, Uppsala University, Sweden.
- 20.06.2024** *Representation Learning and XAI* (Talk), Seminar at the Data and AI Cluster, TU Eindhoven, The Netherlands.
- 25.02.2024** *Pantypes: Diverse Representatives for Self-Explainable Models* (Poster), AAAI Conference on Artificial Intelligence, Vancouver, Canada.
- 07.06.2023** *SuperCM: Revisiting Clustering for Semi-Supervised Learning* (Poster), IEEE International Conference on Acoustics, Speech and Signal Processing, Rhodes, Greece.
- 01.12.2022** *ProtoVAE: A Trustworthy Self-Explainable Prototypical Variational Model* (Poster), Advances in Neural Information Processing Systems, New Orleans, USA.
- 19.10.2021** *Joint Optimization of an Autoencoder for Clustering and Embedding* (Poster), Visual Intelligence Days 2021, Oslo, Norway.
- 13.09.2021** *Joint Optimization of an Autoencoder for Clustering and Embedding* (Talk), ECML-PKDD, Online.
- 10.01.2019** *Toward Deep Clustering* (Talk), Northern Lights Deep Learning Workshop 2019, Tromsø, Norway.
- 16.07.2018** *Mining User Trajectories in Electronic Text Books* (Talk), International Conference on Educational Data Mining, Buffalo, USA.
- 06.08.2017** *Frame-based Data Factorizations* (Talk and Poster), International Conference on Machine Learning, Sydney, Australia
- 22.09.2017** *Infinite Mixtures of Markov Chains* (Talk), NFMCP 2017, The 6th International Workshop on New Frontiers in Mining Complex Patterns, Skopje, North Macedonia.
- 27.09.2017** *Propagating Maximum Capacities for Recommendation* (Talk), KI 2017: 40th German Conference on Artificial Intelligence, Dortmund, Germany.
- 26.06.2015** *Toward Data-Driven Analyses of Electronic Text Books* (Poster), International Conference on Educational Data Mining, Madrid, Spain.
- 26.06.2015** *Generalising IRT to Discriminate Between Examinees* (Poster), International Conference on Educational Data Mining, Madrid, Spain.
- 02.07.2014** *Analysing user behaviour with log data* (Poster), PhDIPF-Academy 2014, Bad Salzschlirf, Germany.
- 09.10.2014** *Mining Implications From Data* (Talk), LWA/KDML 2014 : Workshop on Knowledge Discovery, Data Mining and Machine Learning, Aachen, Germany.
- 12.11.2023** *Knowledge Space Analysis* (Talk), LS-Oberseminars "Advanced Seminar Quantitative Behavioral Sciences", TU Munich, Germany.

Publications

†: The first author is a Ph.D. student I supervised. *: Simple or double first-co-authorship.

International journals

1. * Explaining deep learning for ECG using time-localized clusters. A. Boubekki, K. Patlatzoglou, J. Barker, F. Siong Ng, A. H. Ribeiro. **IEEE Transactions on Biomedical Engineering** (2026). [↗](#)
2. Explainable AI needs formalization. S. Haufe, R. Wilming, B. Clark, R. Zhumagambetov, A. Boubekki, J. Martin, D. Panknin. **npj Artificial Intelligence** 2, 42 (2026). [2 cit.] [↗](#)
3. † SuperCM: Improving Semi-Supervised Learning and Domain Adaptation through differentiable clustering. D. Singh, A. Boubekki, R. Jenssen, M. Kampffmeyer. **Pattern Recognition** (2025) [↗](#)
4. *† Prototypical Self-Explainable Models Without Re-training. S. Gautam, A. Boubekki, M.M. Höhne, M. Kampffmeyer. **Transactions on Machine Learning Research** (2024). [8 cit.] [↗](#)
5. RELAX: Representation Learning Explainability. K.K. Wickstrøm, D.J. Trosten, S. Løkse, A. Boubekki, K.Ø. Mikalsen, M. Kampffmeyer, R. Jenssen. **International Journal of Computer Vision**, 1-27 (2023). [32 cit.] [↗](#)
6. A Contextually Supported Abnormality Detector for Maritime Trajectories. K.V. Olesen, A. Boubekki, M. Kampffmeyer, R. Jenssen, A.N. Christensen, S. Hørlück, L.H. Clemmensen. *Journal of Marine Science and Engineering* (2023). [11 cit.] [↗](#)
7. Selective Imputation for Multivariate Time Series Datasets with Missing Values. A. Blázquez-García, K.K. Wickstrøm, S. Yu, K.Ø. Mikalsen, A. Boubekki, A. Conde, U. Mori, R. Jenssen, J. A. Lozano. *IEEE Transactions on Knowledge and Data Engineering* (2023). [26 cit.] [↗](#)
8. * Clinically relevant features for predicting the severity of surgical site infections. A. Boubekki, J. Nordhaug Myhre, L.T. Luppino, K.Ø. Mikalsen, A. Revhaug, R. Jenssen. *IEEE Journal of Biomedical and Health Informatics* (2021). [5 cit.] [↗](#)
9. * Joint optimization of an autoencoder for clustering and embedding. A. Boubekki, M. Kampffmeyer, U. Brefeld, R. Jenssen. *Machine Learning* (2021). [38 cit.] [↗](#)
10. Predicting the difficulty of exercise items for dynamic difficulty adaptation in adaptive language tutoring. I. Pandarova, T. Schmidt, J. Hartig, A. Boubekki, R. D. Jones, U. Brefeld. *International Journal of Artificial Intelligence in Education*, 29(3) (2019). [83 cit.] [↗](#)

Reviewed international conferences
